Joint Support Powder By Dr Bruce Syme

This unique holistic nutritional supplement formulation supports bones, joints and cartilage. It is ideal for dogs with signs of arthritis and/or recovering from injury. It can assist as a preventative arthritic measure for large breeds and dogs breeds prone to skeletal problems.

Available in 250g, 500g, 1kg and 3kg sizes

Ingredients

Dr Bruce Syme's Joint Support Powder contains pharmaceutical grade glucosamine hydrochloride and bovine extracted chondroitin sulphate and combines to produce a synergistic benefit to joint tissues and joint fluid production. They promote healing of cartilage surfaces, and provide active, ongoing skeletal protection.

Other ingredients include Dolomite powder, Calcium, Flax Seed meal, microencapsulated fish oil (Omega 3) Sulphur, Ginger, Vitamin C, and Boron, with added liver powder for taste. The formulation has natural sources of calcium, magnesium, phosphorous, boron, as well as a broad spectrum of macro and micro minerals and nutrients that aid bone and joint repair and maintenance.

Nutritional Supplement Information

The Joint Support Powder is specifically designed to provide nutritional support for maintaining and assisting repair to damaged joint surfaces, tendons, and ligaments, strengthening bone tissue and density. The formulation includes ingredients that have been proven to naturally reduce inflammation and therefore provide pain relief.

Glucosamine and Chondroitin sulphate (Glycosaminoglycans or GAG's), which are essential for normal joint function and stimulate cartilage repair from damage and arthritis

Dolomite is a rich source of calcium, magnesium and several trace minerals. Calcium and magnesium are required for healthy teeth and bones, normal muscular movement, and correct functioning of the nervous system.

Boron is required to maintain bone density and mineral content and is commonly deficient, along with sulphur and copper, in arthritis sufferers. The combination of these minerals can reverse leaching of calcium from bones (osteoporosis), which contributes to abnormal calcium deposits in arthritic joints, and severely reduces normal joint mobility

Devil's claw is a herb with natural anti-inflammatory activity, and has been used for thousands of years to help control the pain of arthritis and joint degeneration. It combines with Ginger to provide anti-inflammatory pain relief from the degenerative effects of joint disease.

Flax seed meal and Fish Oil provides a source of Omega 3 essential fatty acids that can prevent and help treat the symptoms of arthritis by decreasing the production of inflammatory mediators in the arthritic joint. Vitamin C is an integral component of collagen, the matrix of tissue that forms skin, tendons, ligaments, and bone, and as such, is vital to healing of these tissues from any injury, especially joint and ligament damage

Ginger is a recognised as having anti-inflammatory (pain relief) properties.

Directions for use

Long term use of Joint Support Powder may help improve your dog's joint health and function. Joint Support Powder also contains Vitamin C, Sulfur, Omega 3 and Boron to supplement diets where levels of these nutrients may be low. Ingredients formulated to provide broad, holistic skeletal support.

Not recommended for use in acute or infectious conditions. For a diagnosis to determine these conditions, or in the event of adverse experience (eg. diarrhoea) or where response is unsatisfactory, consult your Veterinarian. Use with caution in pregnant or lactating animals as safe use in these groups has not been established. Use with caution in animals with bleeding, liver or kidney disorders.

It is important to note that it should not be used for puppies less than 4 months of age. Also note that restrictive use is required for giant fast growing breeds and check with a veterinarian to determine if growth plates are still active

Storage

Store below 30°C (room temperature). Protect from moisture, heat and light. Keep container tightly closed.

Dosage instructions

The powder is mixed with dog's moist food before serving. once daily. One level scoop = 10g
Each gram will provide 50mg glucosamine hydrochloride and 47.5mg chondroitin sulphate

The product label includes the dose rate guide.

Bodyweight (kg)	3-5	6-10	11-20	21-30	31-40	40 +
Initial 14 days	½ scoop	1 scoop	2 scoops	3 scoops	4 scoops	6 scoops
Long term use	¼ scoop	½ scoop	1 scoop	1½ scoops	2 scoops	3 scoops

This supplement is specifically important for animals with early onset arthritis and can be considered as an alternative to conventional treatment with anti-inflammatory drugs. It can be continued for life if necessary.
