

Vets All Natural FLAX SEED OIL

General Information

A deficiency in Omega 3 levels can cause a range of health issues relating to the immune system and skin disease. With correct levels of Omega 3 these issues can be corrected in 2-3 weeks of using a daily supplement of Vets All Natural Flax Seed Oil.

With the huge consumption of processed and cooked pet food diets, it is common for Omega 3 to be deficient. It will produce an exceptional natural shine in the coat and assist to control “doggy odour” without needing regular shampoos.

Ingredients

Vets All Natural Flax Seed Oil contains 100% pure; cold pressed Flax Seed Oil and is produced using the “Omega Flow” technique, which ensures the integrity of the oil is maintained.

Flax seed oil provides one of the most potent natural sources of Omega 3 essential fatty acids (>60% Omega 3, 17% Omega 6)

Flax Seed Oil Nutritional Analysis

	Unit	Per 100g
Energy	kcal	884
Total fat	g	100
Total saturated	g	9.4
Total mono-unsaturated	g	20.2
Total poly-unsaturated	g	66
Vitamin E (alpha tocopherol)	mg	17.5

Directions for Use

Supplementation with Flax Seed Oil can be continued indefinitely, but is more essential on a cooked diet, and less necessary on a raw food diet. The suggested dose rate is 1 ml / kg bodyweight (1 teaspoon per 5 kg bodyweight), given once daily for 3 weeks and simply mixed into the animals regular food. Maintenance dosing can be lowered to the rate of 5 ml per 20 kg of bodyweight. For pets with a history of allergic skin disease, I recommend staying at the higher dose long term.

It has a Best Before date of 24 months from manufacture however will keep longer if refrigerated.

Available in 200ml & 500ml
